For a commodity, the price relative to a fixed base is measured by the Laspeyres index. The Laspeyres index is calculated by dividing the current period price of a commodity by the base period price of the same commodity, and then multiplying the result by 100. The Laspeyres index is named after the Dutch statistician Henry Theodor Laspeyres.

The Warsaw Convention may apply and will govern and in most cases limit the liability of Federal Express for loss or delay of or damage to your shipment. Subject to the conditions of the contract.
